

HEALTH HUBS & COMMUNITY ACCESS

Workflow + Reporting Backbone for Health Hubs

We provide a community-ready digital layer that supports intake/navigation, closed-loop referrals, and dashboards/reporting — so hub programs can scale and still prove impact.

ROLE: SUBCONTRACTOR TO HEALTH HUB OPERATORS

FQHCs, hospitals, nonprofits, public health depts

Built on the **EquiLoop™** platform

Navigation + referral tracking + equity reporting

92.3%

Referral Completion Rate
Single EquiLoop™ Deployment

EQUILOOP™ PLATFORM | HEALTH HUBS & COMMUNITY ACCESS

The Challenge

Health hubs extend care into the places people already are — but without infrastructure to track navigation, close referral loops, and report outcomes across partners, programs can't prove impact at scale.

Intake + Navigation

Community-ready intake and consent workflows. Navigation for insurance enrollment, scheduling, transportation, and follow-up. Tasking, reminders, and documentation across sites.

Closed-Loop Referrals

Referral routing and status tracking from creation to completion. Follow-up logging and outcome documentation. Escalation views for aged referrals across partner networks.

Resource Directory + Partners

Service directory buildout with categories, eligibility, and coverage area. Governance model for maintaining accuracy. Performance views for volume, responsiveness, and outcomes.

Dashboards + Reporting

Utilization, navigation, and referral KPIs. Equity and coverage analytics by geography. Exportable quarterly and annual reporting packs for funders and program leadership.

Built for Community Health Hubs

Why Primes Partner

- Better follow-up and referral closure
- Scales across sites and partners
- Measurable outcomes without spreadsheets
- Built for real-world community workflows

Implementation

- Discovery & configuration
- Pilot go-live with training + playbooks
- Scale across sites
- 30/60/90-day optimization cycles

Compliance Posture

- HIPAA-aligned workflows
- RBAC & encryption (transit/at rest)
- Audit logs & incident response
- U.S. data residency support as required
