

Are you prepared to reach all of your attendees and staff in a lockdown situation?

WellCheck is an all-in-one HIPAA compliant Lockdown & Crisis Communication Platform that automates Health & Safety Protocols for organizations, facilities, and events.

Our system was created based on 30 years+ of safety knowledge and law enforcement experience. With WellCheck's enterprise compliance software expertise, our critical event notification system is best positioned to assist organizations in a time of crisis whether it be Active Shooter Alerts, Digital Wellness Screening, and Emergency Mass Notifications during a weather or shelter-in-place situation.

The WellCheck platform allows your staff to instantly alert management of a threat; effectively communicate vital information; and rapidly account for all employees, attendees and visitors as quickly as possible.

Our Lockdown & Crisis Communication Platform allows you to

1 Instantly Alert

Quickly activate in stressful situations

2 Effectively Communicate

One platform to share and distribute vital information

3 Rapidly Account

Know where your people are during an active threat or emergency

Instantly Alert

- Web-based mobile panic button
- Identifying threat types, communicating about injuries and prioritizing individuals needing help
- Templated emergency notifications and custom messages

Effectively Communicate

- Message individually and with the entire group
- Accessible on all devices thru SMS text and email; nothing to download
- Share notifications, images, and instructions on dedicated channels (Admin Staff, Law Enforcement, Families)

Rapidly Account

- Silent accountability and check-ins
- Identify individual's room and building locations
- Account for people both on and offsite
- Real-time access to data analytics dashboard
