

EquiLoop™

Closing the Loop on Health Equity

by WellCheck | www.wellcheck.us

What We Do

WellCheck is a public health innovation company on a mission to advance total health equity through smarter, scalable technology. Our flagship product, EquiLoop, is a Closed-Loop Referral Platform that helps providers, health centers, and community organizations track, resolve, and report on every social and clinical referral—ensuring no individual falls through the cracks.

The Problem

- Over **50% of health and social referrals** never lead to actual care.
- **CMS now mandates** SDoH data tracking, but most systems still rely on **manual spreadsheets** and fragmented workflows.
- Vulnerable communities are underserved, and organizations risk **poor outcomes and lost funding**.

Why It Matters

By addressing Social Drivers of Health such as food, housing, transportation, behavioral health, and more, EquiLoop helps:

- **Protect organizational funding**
- **Comply with federal and grant reporting**
- **Deliver better, measurable outcomes for your community**

The EquiLoop™ Solution

EquiLoop is purpose-built to bridge clinical care with community resources:

- **Digital Enrollment & Consent:**
Simplifies intake for families and providers
- **Automated Referral Tracking:**
Ensures every need is followed through
- **Outcome Reporting Dashboards:**
Deliver real-time visibility and audit-ready data
- **Multilingual Intelligent Follow-Up Engine:**
Drives engagement using culturally sensitive outreach

Proven Impact

In a recent deployment:

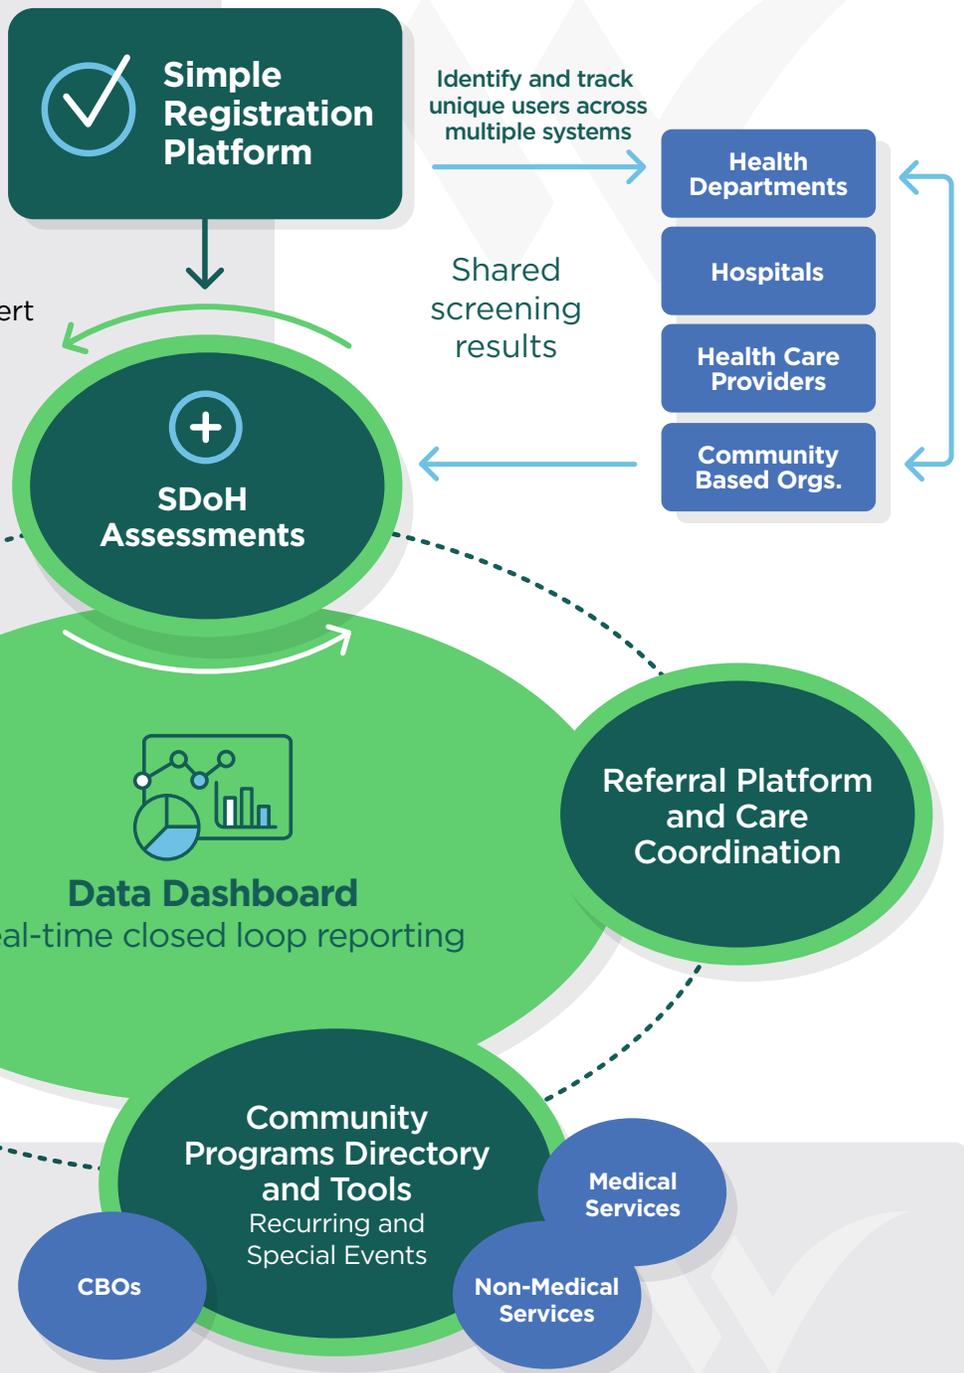

11,129 individuals screened

22,274 services delivered

92.3% referral completion rate

EquiLoop™ Closed-Loop Referral Platform

Our flagship solution, **EquiLoop™**, is a purpose-built **Closed-Loop Referral Platform** designed to convert Social Drivers of Health (SDoH) screenings—covering needs such as food, housing, transportation, and mental health—into actionable, trackable, and measurable outcomes.
